EDUCATION

De La Salle University

Sep 2024 - Present

Bachelor of Science in Computer Science, Major in Software Technology

GPA: 3.564 / 4.0

Relevant Coursework: Web Applications, Database Management, Intelligent Systems, Algorithms and Complexity

PROJECTS

Developer Portfolio Website | React, Tailwind CSS, Vercel

Mar 2026 – Present

- Designed and developed a personal developer portfolio website using React and Tailwind CSS.
- Deployed using Vercel by linking its GitHub repository.

Establishment Review Web Application | React, Bootstrap, Node.js, Figma

Jan 2026 – Present

- Simulated full-stack functionality by adding sample back-end data and implementing state management with useState and useEffect hooks to handle mock authentication and dynamic rendering.

Event Hall Reservation System | Java, JSwing, JDBC, MySQL

Sep 2025 - Dec 2025

- Engineered an automated scheduling system that validates date availability for event halls and staff-in-charge of each booking, and quantity availability for special equipment, preventing booking conflicts using Java back-end logic and SQL queries.
- Designed a user-friendly interface for admins to manage CRUD (Create, Read, Update, Delete) operations, allowing admins to efficiently track booking and client information.
- Provided tables and charts for data reports generated by SQL queries for admins to fetch and analyze specific data (e.g. Individual Hall Utilization, Equipment Popularity).

Turn-Based Fighting Game | Java, JSwing

May 2025 - Aug 2025

- Implemented MVC (Model-View-Controller) architecture to separate back-end game logic from the GUI, ensuring a modular, scalable, and maintainable codebase.
- Engineered turn-based combat logic and three Faux-AI opponents using object-oriented principles, managing character states, move scenarios, and health calculations.
- Implemented an item system that includes giving the player permanent stat modifiers (weapons and armor) or temporary stat boosts (potions).

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C, C++

Frontend: React, React Native, Tailwind CSS, Bootstrap, Vite, HTML/CSS

Backend: Node.js

Database: MongoDB, MySQL, JDBC

Tools: Git, GitHub, VS Code, IntelliJ IDEA, Arduino IDE, Figma, Vercel
